

HIGH-VOLTAGE TRANSMISSION AND THE VISUAL ENVIRONMENT - CONFERENCE NOTIFICATION

A joint event by the Nordic National Grids, hosted by Landsnet

The Nordic National Energy Grids are planning a two day conference.

The title of the conference is: High Voltage Electric Transmission and the Visual Environment. The conference addresses environmental issues and the energy transmission systems. Currently, these matters are of great importance, since environmental issues are becoming an increasing part of the preparation of most electrical transmission projects, both with regards to design and licensing.

The objective of the conference is to draw together specialists, licenseholders and stakeholders to share information and discuss new approaches and current challenges. The conference is a part of a cooperation between Landsnet, Statnett, Fingrid, Svenska Kraftnät and Energinet within the research and development sector.

Further information on the conference schedule and key dates will be published on April 23rd.

Date: 16-17 september 2010

Location: Grand Hotel, Reykjavik - Iceland.

Contact information: conference@landsnet.is

THE CONFERENCE WILL FOCUS ON FOUR PRINCIPAL TOPICS:

- Environmental Impact Assessment and Approvals.
- Environmental Issues, Research and Development.
- Landscape Towers, design and experience.
- High Voltage Underground Cables, policymaking and experience.

WHO SHOULD ATTEND:

- Specialists within the National Grids.
- Representatives of license- and stakeholders.
- Statutory consultees and environmental experts within agencies.
- Consultants on environmental issues and design of high voltage transmission systems.
